CHESTER 5000 Carport

Width: 500cm, Depth: 297.5cm, Height: 218cm

The Chester 5000 carport provides you with a clean lined, modern cover for your driveway or alternately as a gazebo or seating area within your garden space or backyard. If you're looking for a stylish, yet practical structure to provide shade and protect for your vehicle, garden furniture or even an outdoor hot tub then the Chester is the solution for you. This sleek do-it-yourself, maintenance free carport is made to be as efficient and simple to assemble as possible with the sliding panel system. The Chester 5000 provides you family with an elegant and sturdy shelter to be utilized year-round.

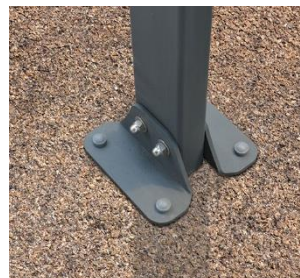

Polycarbonate panels

- Virtually unbreakable bronze tinted 6 mm twin-wall polycarbonate roof panels are high impact, shatter resistant and protect from inclement weather
- Maintain their integrity, provide complete UV blockage, and are 100% UV protected; they do not discolour, fracture, or become brittle over time
- Safe, quick, and easy DIY assembly – Slide and lock roofing panel system
- Ready to assemble pre-cut panels

Aluminium Structure

- Rust-resistant, anthracite powder-coated frame made of heavy-duty aluminium and laser cut galvanized steel connectors
- Ready to assemble pre-drilled profiles

Anchoring

- Requires a solid level surface, Anchoring and footpads included – Secure the carport to the surface of your choosing
- Structure can be easily relocated
- 4 Sturdy and durable 8x4 cm (3.15 in. x 1.57 in.) aluminium poles

Gutter & Heads

- Integrated gutter and gutter heads allow you to easily channel and collect rainwater for a sustainable irrigation system
