The City Corner Fit Overdoor Canopy

Transform the look of your home with a GRP over door canopy, create a welcoming entrance that is both stylish and practical with designs that suit any property. With easy installation and virtually maintenance free, GRP over door canopies offer the perfect choice.

GRP canopies are both lightweight and durable and are made from glass reinforced polyester (fibreglass) making them the simple solution. Our overdoor canopies are more cost effective than a porch, simple to install and look great – giving your front door a distinctive edge.

The process involved in the manufacturing of GRP Front Door canopies begins with the making of a wooden mould. This mould replicates the external look of the canopy and allows for distinctive design elements that add a realistic feel to the final product. The mould is then layered with a mixture of resin and sheets of glass fibre which bond to produce a very strong finished door canopy.

After curing, the product is removed from the mould, polished and painted. The strength of the fibreglass allows for large canopies to be produced as a single item without the need for parts to be bonded together. This not only makes the finished canopy stronger, but more aesthetically pleasing. Brackets can be manufactured separately and mechanically fixed onto the main canopy.

All our prices are inclusive of VAT & shipping within the mainland UK – the price you see is the price you pay!
